JS760FPDS			

Temporarily, models with \* require the latest software update before connecting Shabbos Keeper.  
Download the Smart HQ app from GE Appliances to get connected.

## Shabbos Keeper Compatible Oven List- 2024

### Newly Released Wall Ovens

Single Wall Oven 30"	Double Wall Oven 30"
JTS5000DNBB**	JTD5000DNBB**
JTS5000SNSS**	JTD5000ENES**
JTS5000ENES**	JTD5000SNSS**

The 5000 series of wall ovens are now compatible with the Shabbos Keeper. If your appliance was manufactured after February 2023, it is already compatible. You can verify if your unit has the latest software by accessing the settings and checking for number 4 SabWarm. If this appears on your screen, your oven is already compatible.

**Please take note.**

For the Double wall ovens models, it's important to know that the Shabbos Keeper is exclusively linked to the upper oven and does not have control over the lower oven.

Before proceeding, it's advisable to check whether your Shabbos Keeper includes the "Wall oven installation instructions kit." If it doesn't, please reach out to us for further assistance.

For appliances manufactured between 2019 and February 2023, they can be made Shabbos Keeper compatible by reprogramming with a special SUM module.

If you have any questions or need assistance with Halachic or technical matters, please don't hesitate to contact us at [support@zmantechnologies.com](mailto:support@zmantechnologies.com). We are here to help.
